PROFESSIONAL PROFILE

Junior Web Developer with an achievement as Firebase Studio Challenge Winner at GDG Depok DevFest 2025. Focused on web development using JavaScript, PHP, Laravel, React, MySQL, and Git, with project-based exposure to Next.js, TypeScript, Firebase, Node.js, and PostgreSQL. Completed 800+ hours of intensive vocational training, holds two national BNSP competency certifications, and has experience building web applications from database design, frontend development, API integration, to quality checks using GitHub Actions, PHPStan, Laravel Pint, and PHPUnit.

ACHIEVEMENT

Firebase Studio Challenge Winner | GDG Depok DevFest | Des 2025

Built Pixel Heist Co-op, a browser-based local co-op stealth game using Next.js, TypeScript, Firebase Studio, Cloud Firestore, and Google Gemini. The project was selected as a Firebase Studio Challenge winner and presented in a lightning talk session at DevFest Depok 2025.

PROFESSIONAL EXPERIENCE & INTENSIVE TRAINING

Full-Stack Web Development Trainee | Frontend-Focused BBPVP Bekasi — Ministry of Manpower of the Republic of Indonesia October – December 2025 | 363 hours

Completed an intensive training and on-the-job training program focused on JavaScript-based web application development. Contributed as part of the frontend team in building a project from scratch, with exposure to backend development, API integration, and web application maintenance during the program.

- Contributed to frontend development for a public portal and admin dashboard using React and Vite.
- Built and adjusted UI components, data pages, input forms, and API-based dashboard views.
- Applied Git collaborative workflow, including feature branching, pull requests, code review, and conflict resolution.
- Practiced REST API development during the training phase using Node.js/Express and SQL databases.
- Used MySQL during the training phase and gained PostgreSQL exposure in the OJT/project context.
- Gained exposure to maintenance and adjustments of web applications using other JavaScript stacks, including Vue, Next.js, NestJS, and Node.js.
- Passed the BNSP competency assessment through hands-on development evaluation and technical interview.

Primary Contribution: React, Vite, JavaScript, Git, Linux

Backend & Additional Exposure: Node.js, Express, NestJS, MySQL, PostgreSQL, Prisma ORM, Vue, Next.js

Web Development Trainee | PPKPI Jakarta

May – August 2025 | 480 hours

Completed an intensive vocational training program focused on web development using PHP Native, MySQL, JavaScript, HTML, and CSS. Built an e-commerce platform individually from scratch as the final project for the BNSP Junior Web Developer competency assessment.

- Built an e-commerce platform with user authentication, product catalog, product search, shopping cart, simulated checkout/order flow, product reviews, vouchers/promotions, and admin dashboard.
- Designed a MySQL database with 8 main tables and foreign key relationships: users, products, categories, orders, cart, reviews, vouchers, and order_items.
- Developed an admin dashboard for managing products, categories, orders, users, and vouchers/promotions.
- Implemented session management, bcrypt password hashing, and prepared statements to reduce SQL injection risks.
- Completed the project individually within the BNSP Junior Web Developer competency assessment context and presented it during the technical evaluation.

Tech Stack: PHP Native, MySQL, JavaScript, HTML, CSS

Operational & Service Roles | Self-Funded Career Transition

Jakarta | 2021 – 2025

Worked in various daily operational roles to fund a career transition into web development, while learning programming and web development fundamentals independently before joining intensive vocational training.

- Developed work discipline, adaptability, communication, responsibility, and resilience in shift-based, deadline-oriented, and daily operational environments.
- Handled customer service and light computer troubleshooting while working in an internet café environment, including computer issues, game installation, Windows updates, and basic network setup.
- Continued the career transition through intensive vocational training, BNSP certifications, and web development portfolio projects.

FEATURED PROJECTS

Japanese Travel

Laravel | MySQL | Tailwind CSS | GitHub Actions | PHPStan | PHPUnit

Laravel-based portfolio project for Japanese travel destination information and souvenir commerce, featuring an admin dashboard, bilingual flow, and local-development order/checkout flow.

- Built destination listing, destination detail, souvenir shop, cart, simulated checkout/order flow, order history, and admin dashboard features.
- Developed an admin dashboard for managing destinations, souvenirs, orders, order status/payment status flow, and KPI charts.
- Built checkout and order lifecycle flow as a foundation for simulated payment flow and future payment gateway integration.
- Supported bilingual ID/EN flow with locale middleware and browser-based auto-locale detection.
- Ran quality checks using GitHub Actions CI, PHPStan, Laravel Pint, and PHPUnit automated testing.

Pixel Heist Co-op

Next.js | TypeScript | Firebase Studio | Cloud Firestore | Google Gemini

Browser-based local co-op stealth game built for the Firebase Studio Challenge at GDG Depok DevFest 2025, featuring local multiplayer flow, enemy behavior, leaderboard, and dynamic game configuration using Cloud Firestore.

- Built a local co-op game flow for two players on one device.
- Developed core game logic, enemy behavior, scoring, and win/loss flow.
- Used Cloud Firestore for leaderboard and dynamic configuration.
- Used Firebase Studio/Project IDX and Google Gemini to accelerate game logic development.
- Wrote repository documentation covering the tech stack, main features, and local setup instructions.

TECHNICAL SKILLS

Primary Stack:

- JavaScript, PHP, Laravel, React, MySQL, Git

Frontend Development:

- React, Next.js, TypeScript, Tailwind CSS, Vite, HTML, CSS

Backend Development:

- Laravel, PHP, Node.js, Express, REST API

Database:

- MySQL, PostgreSQL, Firebase Firestore

Tools & Quality:

- Git, GitHub, Linux, VS Code, GitHub Actions, PHPStan, Laravel Pint, PHPUnit

Additional Exposure:

- Prisma ORM, NestJS, Vue, Firebase Studio, Google Gemini

CERTIFICATIONS

BNSP — Web Development with Node.js and React | December 2025

BNSP — Junior Web Developer | September 2025

Dicoding — Belajar Back-End Pemula dengan JavaScript | August 2025

Dicoding — Belajar Membuat Front-End Web untuk Pemula | January 2026

Dicoding — Belajar Dasar Pemrograman JavaScript | August 2025

EDUCATION

SMK Yadika 9 Bintara | Computer and Network Engineering | 2018 – 2021

LANGUAGES

Indonesian — Native

English — Intermediate reading & writing; Basic speaking

Japanese — Basic
